FedReconcile

Modernizing Federal Financial Compliance through AI

The Problem

Manual reconciliations and GTAS submissions drain federal finance teams—introducing delays, errors, and audit risk. Legacy ERP systems lack Treasury alignment and intelligent error correction.

The Solution

FedReconcile streamlines reconciliation and submission workflows across Oracle, SAP, and PeopleSoft ecosystems.

With AI-assisted validation and explainability, your teams get accurate, audit-ready submissions—faster.

Key Features

- AI-driven GTAS & Treasury Edit Reconciliation
- ERP-agnostic: Oracle, SAP, PeopleSoft supported
- RAG layer explains errors & suggests fixes
- Offline-ready & secure (FedRAMP/NIST-aligned)
- Upload & validate ERP configurations (e.g., Oracle SLAM)

Sample Use Cases

- GTAS Trial Balance vs Treasury ATB reconciliation
- ERP configuration alignment with Treasury rules
- Explainable SLA & USSGL edits (via AI)

Security & Compliance

FedReconcile is engineered to align with:

- NIST SP 800-53
- FedRAMP Moderate Controls
- FISCAM & FM QSMO Frameworks
